Most dorms have a locking drawer or box for you to put valuables in. Theft happens, but thankfully it's not that common. Just be sensible and don't leave uber-expensive things lying around when you're not home.

You may not have a roommate that you would choose, but you'll learn to be more open-minded and mature if you work kindly to get along with someone different from yourself. It's a once in a lifetime opportunity.

You will not like everything about your college, so be ready for that. All colleges have ups and downs. Just fall in love with the ups and STAY BUSY. That's the key!!
